

## New BRAKES

CARDONE New Brake Products are grounded in the same reverse engineering competencies that have made our remanufactured products synonymous with quality. Every unit is designed to match O.E. fit, function and performance standards. With 100% computerized testing, CARDONE New Brake Products provide reliable performance you can trust.

- Hardware is supplied to speed installation time (where applicable).
- Special rust preventative process on cast iron units extends product life.
- Weather proof coating extends product life and enhances appearance (where applicable).
- O.E.-grade rubber components and seals meet stringent S.A.E. specifications.
- Anti-rattle/squeal components are supplied to help eliminate noise (where applicable).
- Units are tested with automated computerized test equipment to ensure functionality and reliability.
- On-car validation, when applicable, ensures fit, durability and performance requirements.
- New product design improvements prevent typical causes of original unit failure.
