

Remanufactured **BRAKES**

CARDONE Remanufactured Brakes are the result of years of research and process development aimed at producing the highest quality products in the aftermarket. Reverse engineering provides insight into why a product fails and allows us to improve upon any original design flaws - often resulting in products that perform better than O.E. Computerized testing and on-car validation ensures that every unit meets fit, function and performance requirements.

- Unit is completely disassembled, cleaned and examined for wear and breakage.
- Worn out, missing or non-functioning components are replaced with new or rebuilt components.
- Hardware is supplied to speed installation time (where applicable).
- Special rust preventative process on cast iron units extends product life.
- Weather proof coating extends product life and enhances appearance (where applicable).
- O.E.-grade rubber components and seals meet stringent S.A.E. specifications.
- Anti-rattle/squeal components are supplied to help eliminate noise (where applicable).
