

## Remanufactured **DRIVETRAIN**

CARDONE Remanufactured Drivetrain Products are the result of years of research and process development aimed at producing the highest quality products in the aftermarket. Reverse engineering provides insight into why a product fails and allows us to improve upon any original design flaws - often resulting in products that perform better than O.E. Computerized testing and on-car validation ensures that every unit meets fit, function and performance requirements.

- Threads and splines are renewed on every unit to ensure proper fit.
- Automated grinding maintains the original design of the outer housing, race and cage.
- Shafts are measured for straightness to ensure there are no vibration issues.
- Unit is completely disassembled, cleaned and examined for wear and breakage.
- Worn out, missing or non-functioning components are replaced with new or rebuilt components.
- High-temperature grease is utilized to extend the life of the unit.
- High-quality neoprene boots are utilized to ensure durability and longevity.
- Clamps are tightened pneumatically for a perfect seal between the boot and housing.
- New axle nut is supplied for torque prevailing nut applications, as necessary.
